"It's been great working with such a professional as you"
- Allen Prouty / Senior Transportation Project Manager - WHPacific

"I'm so glad that you came over to help us. Everyone here LOVES ProjectNet. They are so pleased with it. "
- Heather Fields / Marketing Manager - Peterson Consulting Engineers

Ellwood Systems, Inc.

"I want to thank you for all the hard, immediate work you have done in such a compressed timeframe." - Sonija Murray - Director / SH&E

"...you do a great job and help me out when I am in a jam - and make us all look good in the process. keep it up! I appreciate your quick help as well." - David Williams - Transportation Director - WHPacific

"...he is one of the most integrated thinkers I have had the pleasure to partner with and he has taken a vision we prepared a mere year ago and elevated it to a more global mission then ever thought possible."
- Megan O'Brien - Puget Sound Energy

ABOUT

Your Key to High Performance IT.

Serving Engineering & Professional Services firms in Oregon and Washington with business analysis, software systems development, and dedicated IT support since 2001.

Ellwood Systems, Inc. (ESI) is dedicated to helping organizations effectively collect, organize, analyze and share information associated with daily business operations. Capitalize on your Business Intelligence! Make informed decisions with an Enterprise Resource Planning system that is seamlessly integrated into your daily workflow. Whether you need help keeping your internal operations under control, need to efficiently manage field personel, or would like to utilize cutting edge IT technology to enhance and sharpen your business services; ESI is the perfect addition to your team!

All successful systems begin with a clearly defined understanding of your business process and requirements. ESI will work closely with your IT department, management, and production staff to quickly and cost-effectively document a clear picture of your operational workflow. This documentation will serve as a "road map" for developing a tightly integrated, high performance system. John Ellwood has been successfully working with clients since 2001 and is solely responsible for all of ESI's products and services.

If you have a Microsoft Windows network, chances are you already own all the software needed to implement the typical ESI database/web solution. ESI can seamlessly integrate new functionality into your existing Intranet portal, reporting, or other tracking systems. ESI will help you take full advantage of the IT infrastructure you already have in place, and software you already have licensed.

Contact John Ellwood to find out what ESI can do for you!
